

Notice!

It is important that previous issues of catalogues should be destroyed, owing to numerous changes, first appearing in this book.

With this catalogue many of our lines, especially certain styles of Drop-forged Wrenches, have undergone changes in numbering, in order to bring about a system that will in time be a convenience to the users of the goods. We have done this believing that the end will justify the immediate inconvenience to all concerned. Where changes have occurred, Old Numbers are shown beside the New Numbers in the catalogue tables and all changes have been so made that no doubt can arise as to the goods required in filling orders, even if old numbers are specified.

We have in preparation a catalogue of smaller size (pocket edition), to be composed in legible type sizes and will be pleased to furnish these for your employees and others who may be interested in the sale or use of our products.

New Lines

Clamps, "C" "Agrippa"	67
